

February 28, 2014
Final Values - 2014

2014 CURRENT AGRICULTURAL USE VALUE OF LAND TABLES

**EXPLANATION OF THE CALCULATION OF VALUES
FOR VARIOUS SOIL MAPPING UNITS FOR TAX YEAR 2014**

The annual current agricultural use values of land are calculated by the capitalization of net income from agricultural products assuming typical management, cropping and land use patterns, and yields for given types of soils. The necessary information is available for approximately 3,500 map units, which are the soils with slopes of 25 percent or less. The information used for a capitalized net income approach is as follows:

- YIELD INFORMATION
- CROPPING PATTERN
- CROP PRICES
- NON-LAND PRODUCTION COSTS
- CAPITALIZATION RATE

Each of these factors is explained below.

A. YIELD INFORMATION

For each of the soil mapping units, data regarding typical yields of each of the major field crops (corn, soybeans and wheat) were last published in 1984. In order to reflect more accurate yields, those yields of record have been updated annually since 2006. The yields are updated by a factor based on ten years of statewide yield information published by the Ohio Department of Agriculture. For 2014, yield data from calendar years 2003-2012 were averaged and divided by the 1984 yield for each crop (Exhibit A, page 5). This factor is applied to the 1984 crop yield of record for each soil. The table below shows the average yields used to develop the factor for each of the crops.

		TY 2011	TY 2012	TY 2013	TY 2014
Crop	1984 Base	2000-2009	2001-2010	2002-2011	2003-2012
Corn	118.0 bu	144.9	146.5	148.5	151.9
Soybeans	36.5 bu	42.5	43.1	43.7	45.0
Wheat	44.0 bu	67.3	66.2	65.3	66.0

B. CROPPING PATTERNS

The cropping pattern for each map unit is assigned a rotation based on the most recent five-year average of crop acres harvested in Ohio: 38.6% corn, 52.0% beans, and 9.4% wheat. This rotation is based on data from 2008-2012 and closely reflects current agricultural production in Ohio. The acres harvested in each year are shown in Exhibit B (page 6).

There are two exceptions as follows:

- 1.) Soil map units with a productivity index of 55 or less are assumed to be most profitably used as pasture; in 2014, a minimum value of \$350 is used for these soils. In 2012 and 2013 a minimum value of \$350 is used for these soils; in 2011, the minimum value is \$300 and in 2010, the minimum value is \$200.
- 2.) A pattern of 50% corn and 50% soybeans is used for organic soils.

C. CROP PRICES

The crop prices used for the field crops are five-year weighted average prices. Crop price data is collected for seven years with the highest and lowest prices eliminated, and the average calculated using the remaining five years' data. The prices are weighted based on the statewide production for each year. For this calculation, the seven-year period is 2006 through 2012. The annual production and price per unit for each of these crops for the 2006 through 2012 period are shown in Exhibit C (page 7).

The table shows average weighted prices for this period as well as prices for the three previous years. Each weighted price is reduced by 5% to allow for management.

		TY 2011	TY 2012	TY 2013	TY 2014
Crop	Unit	2003-2009	2004-2010	2005-2011	2006-2012
Corn	Bushel	\$2.89	\$3.19	\$3.91	\$4.48
Soybeans	Bushel	\$7.22	\$7.74	\$8.98	\$10.13
Wheat	Bushel	\$3.64	\$3.98	\$4.54	\$5.16

D. NON-LAND PRODUCTION COSTS

Data on crop production costs are used to estimate average non-land production costs. The data are taken from the Ohio Crop Enterprise Budgets prepared by The Ohio State University Department of Agricultural, Environmental, and Development Economics for 2007-2013, inclusive. Again, data are collected for the seven-year period and the highest and lowest costs for each category are eliminated from the array. Five-year average costs per unit of specific non-land production cost items are computed from the remaining data as shown in Exhibit D (pages 8-9).

The budgets are computed for each crop at a base yield equal to the lowest yield reported and for each additional unit above the base yield based on information from the Ohio Crop Budgets (Exhibits D-1 through Exhibit D-3, pages 10-12). The five year average non-land production costs for tax year 2014 are summarized below and compared with the costs used for tax years 2011 and 2013:

NON-LAND PRODUCTION COSTS				
Crop Base Cost	Yield/2013	TY 2011	TY 2013	TY 2014
Corn	120 bu	\$300.98	\$391.90	\$437.85
Soybeans	36 bu	\$204.60	\$248.69	\$275.21
Wheat	52 bu	\$192.94	\$230.62	\$255.48
Additional Cost per Unit				
Corn	1 bu	\$ 0.84	\$ 1.04	\$ 1.18
Soybeans	1 bu	\$ 0.77	\$ 1.12	\$ 1.27
Wheat	1 bu	\$ 1.19	\$ 1.61	\$ 1.80

E. CAPITALIZATION RATE

Five-year averaging is used to derive the Farm Credit Service interest rate of 5.89% assuming a 60% loan for a 15-year term, payable annually, and an interest rate of 5.25% for the 40 percent equity portion (Exhibit E, page 13). A five percent appreciation over a period of 5 years is included to address the increase in farmland values due to the demand for additional land in an increasingly efficient operation.

The capitalization rate for typical Ohio farmland is computed by the Akerson mortgage-equity method as follows:

60% loan x annual debt service of 0.102224	=	0.0613
40% equity x equity yield rate of .0525	=	<u>0.0210</u>
Subtotal		0.0823
<u>Less equity buildup for 5 years</u>		
% loan x % mortgage paid off x sinking fund factor at equity rate for 5 years		
(0.60) [1- (7.3986/9.7824)] (0.180073)	=	(0.0263)
<u>Less 5% appreciation times sinking fund factor</u>		
@ equity yield rate of .0525		
.05 x 0.180073	=	<u>(0.0090)</u>
Capitalization Rate before Taxes	=	0.0470 or 4.7%

For tax year 2012 the statewide average effective tax rate after application of the reduction factors, (Section 319.301 Ohio Revised Code), levied on agricultural property was 47.11 mills. The ten percent rollback authorized by Section 319.302 of the code reduced this rate further to 42.40 mills. As a percent of market value the effective tax rate to be used in this year's capitalization formula is 1.5%, (.35 x 42.40)/1000.

Capitalization rate including R.E. taxes 6.2%
The 6.2% capitalization rate is the base rate for typical Ohio farmland.

F. CROPLAND VALUES

The current agricultural use cropland value equals the rotational net return per acre of the soil map unit divided by the capitalization rate. However, the minimum value for cropland is \$350 per acre for soils with 25 percent slope or less regardless of this calculated amount. In 2012 and 2013, the minimum value is \$350 for these soils; in 2011, the minimum value is \$300 and in 2010, the minimum value is \$200.

G. WOODLAND VALUE

1. The woodland value, with slopes of 25% or less, equals the cropland value less the costs to convert the woodland to cropland. The conversion costs used in the formula are as follows:

a. Clearing - \$500 per acre for all soils

b. Drainage

a.) Excessively drained, well drained, moderately well drained, (E, W, MW) - No Conversion Cost

b.) Somewhat poorly drained, poorly drained, very poorly drained, saturated (SWP, P, VP) - \$500 for Tile Drainage

c.) For the following soil series, a \$250 adjustment for surface drainage was used: Allis, Atkins, Blanchester, Bono, Canadice, Clermont, Condit, Conneaut, Darien, Delmar, Frenchtown, Fries, Ginat, Ilion, Latty, Lorain, McGuffey, Mill, Miner, Montgomery, Muskego, Pauling, Peoga, Piopolis, Purdy, Roselms, Sheffield, Swanton, Toledo, Trumbull, Valley, Wabash, Wabasha, Warners, Wayland, Willette, and Zipp.

2. The minimum value for woodland with slopes of 25% or less is \$230.

H. PASTURELAND VALUE

Where soil map units listed in these tables or comparable soils are used for permanent pasture, the land should be valued as cropland.

I. MINIMUM VALUES

Slopes of 25% or less:

Cropland & pasture	\$350
Woodland	\$230

Slopes greater than 25%:

Woodland & pasture	\$230

**INTEREST RATES USED IN CAPITALIZATION RATE
2008-2014**

TAX YEAR	INTEREST RATE	EQUITY RATE
2008	6.95	9.25
2009	6.55	5.25
2010	6.70	5.25
2011	6.05	5.25
2012	4.70	5.25
2013	4.30	5.25
2014	5.45	5.25
	5.89	5.25

* Interest rate is based on a 15-year fixed multi flex loan offered by Farm Credit Services of Mid-America at www.e-farmcredit.com/TodaysRates/FarmRates.

** Equity rate is the prime rate plus 2% at www.bankrate.com from the Wall Street Journal's bank survey.

**ACTUAL CAPITALIZATION RATES USED IN CALCULATION
2008-2014**

TAX YEAR	CAPITALIZATION RATE
2008	8.3%
2009	7.9%
2010	7.8%
2011	7.6%
2012	7.5%
2013	6.7%
2014	6.2%
